P-series

The Challenge

- Loose coupling of multiple links, need to achieve integrated management
- Full process automation with timeliness, cost and efficiency

Geek+ Solution

- Implemented the Geek+ Fleetsort system.
- Deployed a combination of S20T and P500 robots.
- Achieved fully automated parcel sorting for higher throughput and reliability.

Geek+ Impact

- For the first time, "last-mile picking" and "overstock picking" are carried out simultaneously
- 1000+ shipments per hour
- 99.99% order fulfillment accuracy rate

About Customer

- Paack is a technology-enabled delivery solution provider that currently delivers millions of orders per month to approximately 150 international customers such as Amazon, Apple, Inditex, AliExpress, Nike and Nespresso.
